Subject Miller Salvage

Mark,

I spoke with DSW today regarding the storm water permit and the status of the current PTI. Mill's Pride will have to meet the substantive requirements of the Ohio EPA storm water rule. We will be happy to talk with Mill's Pride to let them know what will need to be done to meet the requirements of the rule. During wood waste removal, if Mill's Pride determines that the diversion ditch must be moved or altered they must meet the requirements of the existing PTI. OEPA DSW will answer any questions and work with Mill's Pride during the course of the removal action. Hopefully, any potential problems can be eliminated by discussing potential issues up front.

Please don't forget to send me a copy of Appendix D. If we have any other comments we will get them to you ASAP. Call me if you have any questions.
